Write the what in 2-8 words here (Examples: Website redesign, Shopify website migration to Wix, Creating a 5 page business website in WordPress, Shopify website creation, etc.)

"You have to integrate "payU" payment along with a form"
Existing website Link:
https://interviewknight.com/

Elaborate the "WHAT" 3-4 lines here (The client needs a 5 page static WordPress website for his new design agency. It should include home, about, his services in one page, blog, and contact. The look and feel should be better than the references.)

-You have to integrate payU payment integration on the website.
-You have to make sure when user click on "Get a free trial" https://prnt.sc/nVuyFAEY_if3 button there will be a popup form which will take user Name, Phone and Email and will send that data to mail.(User have to Logged in for this)
-You have to remove About, Courses and My account pages.
-You have to remove the My account page from the footer also.

Reference websites and what the references are for (Ex: ABC.com is for the color scheme. XYZ.com is for section layouts DEF.com is for header & footer styling. However, none of these can be copied)

Existing website Link:
https://interviewknight.com/

Any particular focus/concern of the client (Ex: 1. The client is very concerned about the final look & feel so needs to be careful with the design 2. The client is very concerned if the booking functionality will work the way he wants.)

N/A

Required logins (Whichever of these are applicable: Wordpress, FTP, Cpanel, shopify, Domain register)

payU Login:
email- krankush008@gmail.com
and select otp instead of password.

Wp access:
Login Link: https://interviewknight.com/wp-admin/
mail: krankush008@gmail.com
Pass:atylbvc_+90B

Logo (Upload the google drive link here. Always ask for PSD and AI files so they are editable)

N/A

Deadline

15th December, but you can ask for 1/2 days extra if you need.

If there is any cross-departmental work involved in this project (Example: SEO, Content writing, design, google ads, social media marketing, email marketing & anything else that is not explicitly included in web development)

N/A

Any other notes for the project manager/technical team
